

FREESTANDING 4L

Designed as a basic expression of a desk, the Upgrade collection is responsive to settings across the entire office floorplate to create the most out of your environment.

FREESTANDING 4L

The extra-long top frames of the Upgrade collection provide spacious table tops for 4-legged conference tables, as well as the everyday home or office desk.

Value Added

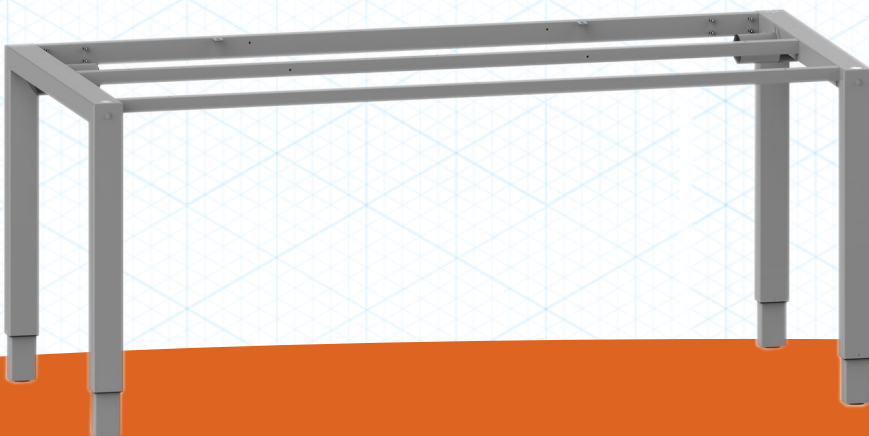

A cost-effective alternative to traditional fixed conference room tables, Upgrade shares the benefits of a fixed table - elegance, scalability, and increased leg space - but as an ergonomic, height-adjustable solution.

Residential Design

Like a traditional 2-legged freestanding system, Upgrade only uses 2 motors - keeping costs low while adding a warm, residential look & feel.

Spatial Efficiency

A product solution with long top frames created to meet any large table requirement (up to 84" table tops). Combine more than one Upgrade desk to accommodate even larger conference table applications.

Features	Specs
----------	-------
