

e-ZGO™ SERIES

Ergonomics matter – whether work occurs at the office or at home. At the same time, products built for the traditional office are designed to meet a broad range of performance standards and often reflect the price points necessary to achieve these requirements. However, when working from home, we should be able to choose products that offer exactly what we need and at prices that fit our budget. Why pay for performance and features that aren't necessary?

ZGO listened, and we are excited to offer a portfolio of height adjustable tables that deliver the right performance at the right price, and ready to ship right to the home. The e-ZGO™ series products are based on ZGO's high performing, commercial grade product designs which have been optimized for Work From Home applications.

Series 11

Series 11 offers all the capabilities of Series 10 but has been enhanced to support a total of 80kg (176 lbs.) of load capacity. More performance, more value.

Enhanced Performance:

A single, quiet motor (<40db) to power the entire unit and 0.1w standby power for the budget-conscious user. Series 11 offers an electric lift up to 80kg/176 lbs. and a travel speed of 36mm/1.4" per second.

Simple Design:

The rectangular, inverted column (small tube at the bottom/large tube at the top of the column) features a 500mm/19.7" stroke and an overall travel range from 655-1155mm/ 25.8-45.5". The expandable frame accommodates the most common table top shapes & sizes from 24x48" to 30x60".

Performance without Compromise:

Series 11 is an entry level, UL 962 approved frame that offers all the necessary features for a work from home desk. Features like 3 memory positions, anti-collision, and gyro-scope safety technology are included as standard options. Available in ISTA 3A certified packaging to ensure safe, drop shippable parcels wherever and whenever you need them.

e-ZGO™ Series 11

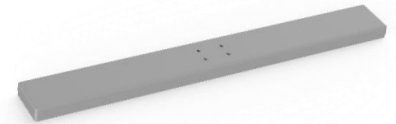

Series 11 offers the same specs as Series 10 but upgraded Speed and Load Capacity.

Features	Specs		
 Leg Quantity	2 Leg	 Column Foot Connection	T or C Leg
 Leg Stage	2 Stage	 Feet Length	600mm / 23.6"
